DETAILED ACTION

1. This communication is in response to amendment filed 6/22/07.

Response to Amendment

2. Claims 1,5,6,17 and 18 have been amended. New claims 19-26 have been added.
Claims 1, 5-8 and 10-26 are pending and have been allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The claimed inventions pertain to online auction and in particular processing bids wherein a plurality of line items is associated with the bids.

Claims 1,5-8 and 10-26 are allowed because the prior art of record fails to teach or suggest an online auction which comprises the features of calculating a total bid value by performing a function including a predetermined formula on the bid variables associated with bidding for a lot of goods having a plurality of line items and each line item associated with a bid variable, calculating a total bid value by performing a function on the bid variables using initial values for each bid variable from the bidders wherein each line item is associated with a weight factor determined by an enterprise buyer receiving the bids, when combined with a bid variable associated with a respective line item, contributes in the total bid value of the lot of goods, and wherein the total bid value is used to bid on behalf of the respective enterprise supplier bidder for the lot of goods as a whole and the total bid value is further used by respective enterprise

supplier bidder to determine the bidding position by comparing total bid values of a remainder of the plurality of enterprise supplier bidders.

The closest prior art reference Parunak et al (US 2002/0013631) discloses a method of automatically adjusting a total bid value for a multiple variable bid for an online auction and wherein the total bid value is calculated by performing a function on multiple bid variables (see p. 9, col. [0125]-[0137], in particular sum of the prices of the offers to made by the ith agent and rules applied in formulating bids as explained in para [0134]-[0135]).

However, Parunak fails to teach or suggest calculating a total bid value by performing a function including a predetermined formula on the bid variables associated with bidding for a lot of goods having a plurality of line items and each line item associated with a bid variable, calculating a total bid value by performing a function on the bid variables using initial values for each bid variable from the bidders wherein each line item is associated with a weight factor determined by an enterprise buyer receiving the bids, when combined with a bid variable associated with a respective line item, contributes in the total bid value of the lot of goods

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
